

Resume Tips and ATS Guide

Resume Writing Tips

- Keep your resume clean and ATS-friendly.
- Use action verbs like Built, Developed, Analyzed, and Improved.
- Add measurable achievements whenever possible.
- Keep resume length to one page if you are a fresher.
- Use consistent formatting and spacing.

ATS Optimization

- Include keywords from the job description.
- Use standard headings like Skills, Projects, and Experience.
- Avoid tables, graphics, and excessive colors.
- Use readable fonts and proper spacing.

Project Section Tips

- Include 2–4 strong projects.
- Mention technologies used.
- Explain the business problem solved.
- Add GitHub and deployment links.
- Focus on real-world impact.

Common Resume Mistakes

- Spelling and grammar mistakes.
- Too much theory and no projects.
- Weak project descriptions.
- No measurable achievements.
- Generic career objective statements.
