

Career Roadmaps Guide

Data Science Roadmap

- Learn Python fundamentals and problem solving.
- Master NumPy, Pandas, and data cleaning.
- Learn data visualization using Matplotlib and Seaborn.
- Study statistics, probability, and hypothesis testing.
- Understand machine learning algorithms.
- Build real-world projects and dashboards.
- Learn model deployment using Streamlit or Flask.

AI/ML Engineer Roadmap

- Learn Python and mathematics for machine learning.
- Study supervised and unsupervised learning.
- Learn deep learning using TensorFlow or PyTorch.
- Build NLP and computer vision projects.
- Understand transformers and LLMs.
- Learn vector databases and RAG systems.
- Deploy AI applications on cloud platforms.

Data Analyst Roadmap

- Learn Excel and SQL deeply.
- Master Python for analytics.
- Build dashboards using Power BI or Tableau.
- Practice business case studies.
- Create portfolio projects using real datasets.
- Prepare for SQL and analytics interviews.
